γ-Amino-Butyric Acid
Inosine
L-Lactic Acid
D-Glucose-6-PO4
L-Aspartic Acid
α-D-Glucose
D-Mannitol
D-Arabitol
D-Fructose
D-Mannose
D-Galactose
myo-Inositol
L-Glutamic Acid
D-Gluconic Acid
N-Acetyl-D-Glucosamine
L-Alanine
L-Histidine
D-Serine
Gelatin
D-Aspartic Acid
Propionic Acid
L-Pyroglutamic Acid
β-Hydroxy-D,L-Butyric Acid
α-Hydroxy-Butyric Acid
α-Keto-Butyric Acid
L-Arginine
L-Fucose
D-Sorbitol
Quinic Acid
Glycerol
Acetic Acid
Formic Acid
D-Fucose
Tween 40
D-Malic Acid
D-Trehalose
L-Serine
Mucic Acid
D-Saccharic Acid
Citric Acid
D-Fructose-6-PO4
L-Malic Acid
L-Rhamnose
D-Cellobiose
D-Maltose
β-Methyl-D-Glucoside
Sucrose
Gentiobiose
L-Galactonic Acid Lactone
D-Glucuronic Acid
D-Galacturonic Acid
D-Salicin
Glycyl-L-Proline
D-Raffinose
Dextrin
Pectin
N-Acetyl-β-D-Mannosamine
α-D-Lactose
D-Melibiose
3-Methyl Glucose
Methyl Pyruvate
Glucuronamide
Bromo-Succinic Acid
N-Acetyl-D-Galactosamine
D-Turanose
Acetoacetic Acid
D-Lactic Acid Methyl Ester
α-Keto-Glutaric Acid
N-Acetyl Neuraminic Acid
Stachyose
p-Hydroxy-Phenylacetic Acid
Genus
b
Pantoea
Burkholderia
Seed Metabolite
PC2 (45.2%)
PC1 (52%)
c
Pantoea
Consumed: 10
Produced: 3
−log10(FDR)
Log2 Fold Change
d
Burkholderia
Consumed: 21
Produced: 11
Consumed
NotSig
Produced
−log10(FDR)
Log2 Fold Change
e
count
f
Microbial metabolism in diverse environments
Biosynthesis of various nucleotide sugars
beta-Alanine metabolism
Cyanoamino acid metabolism
Phenylalanine metabolism
Xylene degradation
Peptidoglycan biosynthesis
ABC transporters
RNA degradation
Styrene degradation
Nicotinate and nicotinamide metabolism
Two-component system
Quorum sensing
Tryptophan metabolism
Pentose phosphate pathway
Inositol phosphate metabolism
Valine, leucine and isoleucine degradation
Benzoate degradation
Degradation of aromatic compounds
Bacterial chemotaxis
Metabolic pathways
Biosynthesis of secondary metabolites
Bacterial secretion system
Starch and sucrose metabolism
Pantothenate and CoA biosynthesis
Propanoate metabolism
Sulfur metabolism
Arginine biosynthesis
Sulfur cycle
Cysteine and methionine metabolism
Chloroalkane and chloroalkene degradation
Lipoic acid metabolism
Phosphotransferase system (PTS)
Purine metabolism
Pyrimidine metabolism
D-Amino acid metabolism
Fatty acid metabolism
Histidine metabolism
Other carbon fixation pathways
Carbon metabolism
Arginine and proline metabolism
Glycine, serine and threonine metabolism
Nitrogen metabolism
Valine, leucine and isoleucine biosynthesis
Biosynthesis of amino acids
Flagellar assembly
Phenylalanine, tyrosine and tryptophan biosynthesis
Citrate cycle (TCA cycle)
Ribosome
Pantoea
Burkholderia
